YAI WEB AI

The YAI Web AI dashboard is a comprehensive management tool. It features a top navigation bar with user information (KASSAPA GUNASINGHA, ID: TL02) and system status (Daily Hrs: 0h, Weekly Hrs: 14h 52m, OT Hrs: 0h, AL Bat: 6.5d). The main area is divided into three columns: Administration, Management Dashboard, and Operations. The Administration column includes icons for Sales, Accountant, HR, Admin, CSR, Shipping, and E-GOVERNMENT. The Management Dashboard column includes icons for Noticeable, QA, Production, 4DP, YPI, and MPR. The Operations column includes icons for YQMS, FC, 4DP, YPI, and MPR & MPO. A chat interface at the bottom allows users to interact with the YAI AI agent, with a recent query about worker absences.

Administration

- Sales
- Accountant
- HR
- Admin
- CSR
- Shipping
- E-GOVERNMENT

Management Dashboard

- Noticeable
- QA
- Production
- 4DP
- YPI
- MPR

Operations

- YQMS
- FC
- 4DP
- YPI
- MPR & MPO

Chat Interface:

Yai AI agent · online

How many workers are absent today?

14 of 612 · 2.3%. Line 3 has 5 — your highest: Sokha, Dara, Chanthy, Bopha, Rith. Message the supervisor?

Yes, send it

✓ Sent to Mr. Vannak (Line 3).

Ask Yai... KH / EN / 中文

YAI MOBILE AI

The YAI Mobile AI app provides a mobile-optimized interface. It features a user profile (Gamini Ka, Texlink · TL02) and a video feed of a smiling woman. The app includes several service buttons: Phsar Market (128 shops), Service Market (3 requests), Factory Supply Market (2 orders), and My Yai (ask me). A bottom navigation bar includes icons for Home, Services, My Yai, and Profile. A section titled 'Corporate Services' includes buttons for YACC, YHR, YADMIN, and YCSR.

User Profile: Gamini Ka, Texlink · TL02

Video Feed: @yaikh2025 · Ai for garment factory. Run your factory from your phone.

Services:

- Phsar Market: 128 shops
- Service Market: 3 requests
- Factory Supply Market: 2 orders
- My Yai: ask me

Corporate Services:

- YACC
- YHR
- YADMIN
- YCSR

Bottom Navigation: Home, Services, My Yai, Profile

YAI AIOT

The YAI AIOT interface displays various IoT devices and their corresponding data. It includes sections for Electricity, Water, Humidity · temp., Waste pad, Water sensors, and Waste KPIs. Each section shows a device image and its associated data.

Electricity: Phsar Market (128 shops), Service Market (3 requests), Factory Supply Market (2 orders), My Yai (ask me).

Water: Water meter.

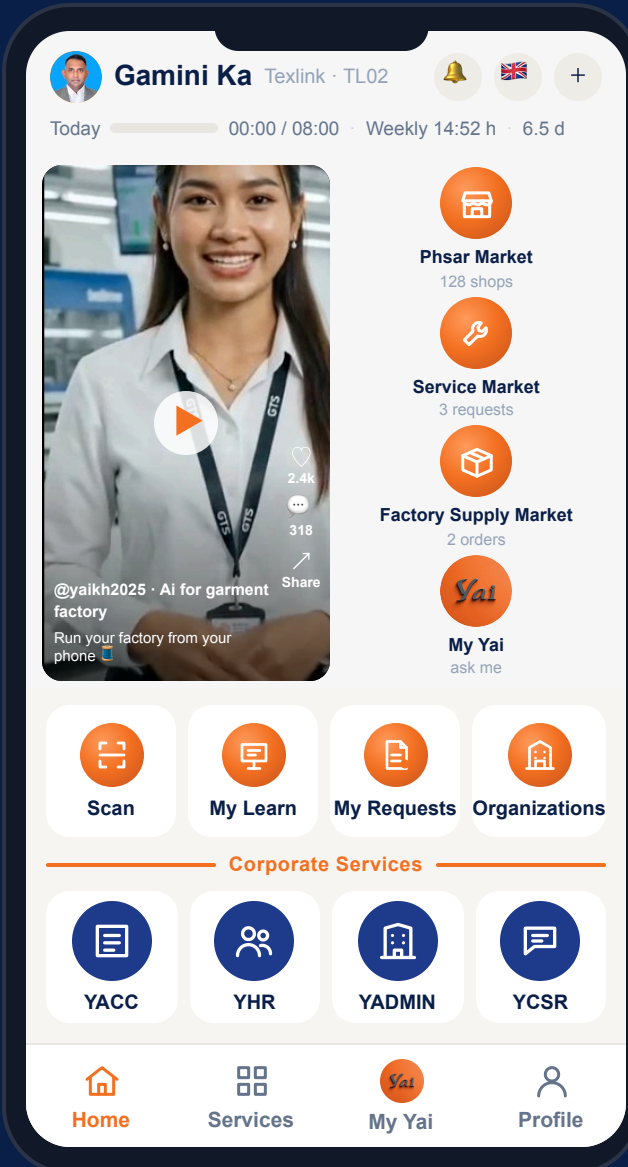

Humidity · temp.: Humidity and temperature sensor.

Waste pad: Waste pad sensor.

Water sensors: Water sensor.

Waste KPIs: Waste KPIs.

Yai MOBILE AI

VIDEO FEED

Short clips on the home screen — TikTok-style, in Khmer. The company posts onboarding, safety, quality and HR notices; organizations post theirs — TAFTAC, brands, auditors, government. Yai tracks who watched and finished; workers earn training credits to claim Yai gifts.

PHSAR MARKET · ផ្សារ

Users post their own products — farm produce, home-made food, handicraft, local goods. Buyers in Cambodia and overseas browse and order; Yai handles listing, chat and delivery. Payment and order handling fully secured through ABA and Wing.

SERVICE MARKET

Service providers post their services — machine repair, calibration, transport, cleaning, catering, training. Factories order in the app; providers take the order and get paid securely.

FACTORY SUPPLY MARKET

Factories place large orders for non-production materials — admin consumables, spare parts, maintenance material; wholesale vendors join to supply them. Payments and deliveries go through official channels.

MY YAI

Supports work functions and everyday tasks alike — reminders, searching clients, products and prices, answering from the factory's own data.

SUPPORTING TOOLS

Scan — QR scanner for any QR need in Yai · **My Learn** — training, scores, credits · **My Requests** — support tickets and item requests · **Organizations** — own HR, ILO and Yai partner organizations.

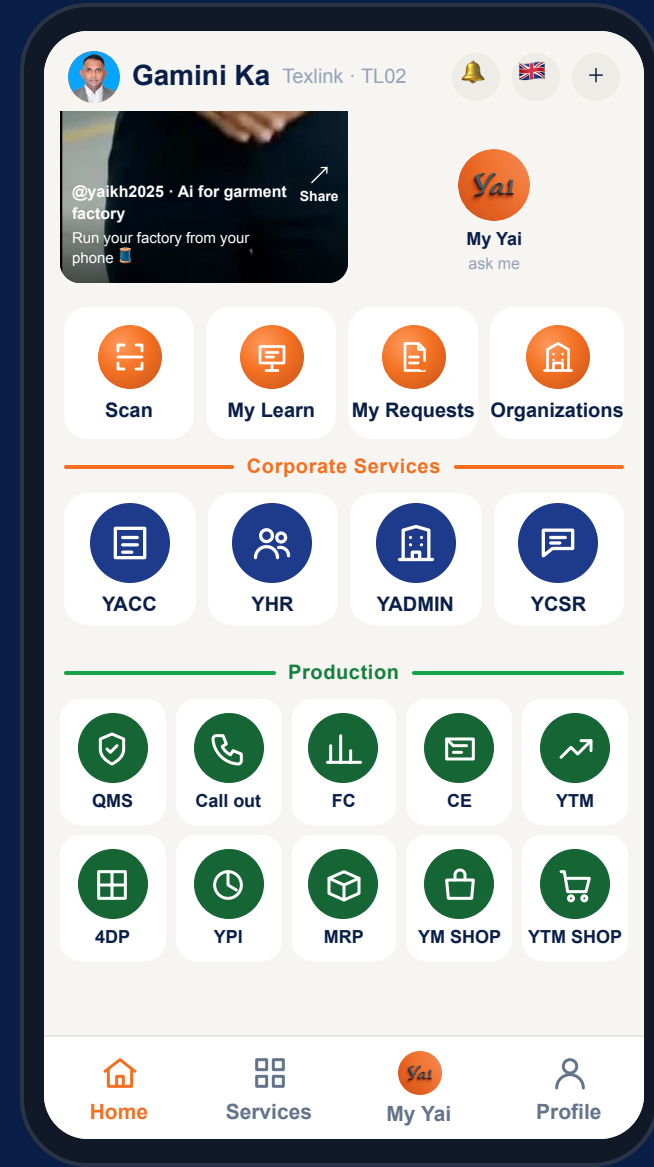

CORPORATE SERVICES

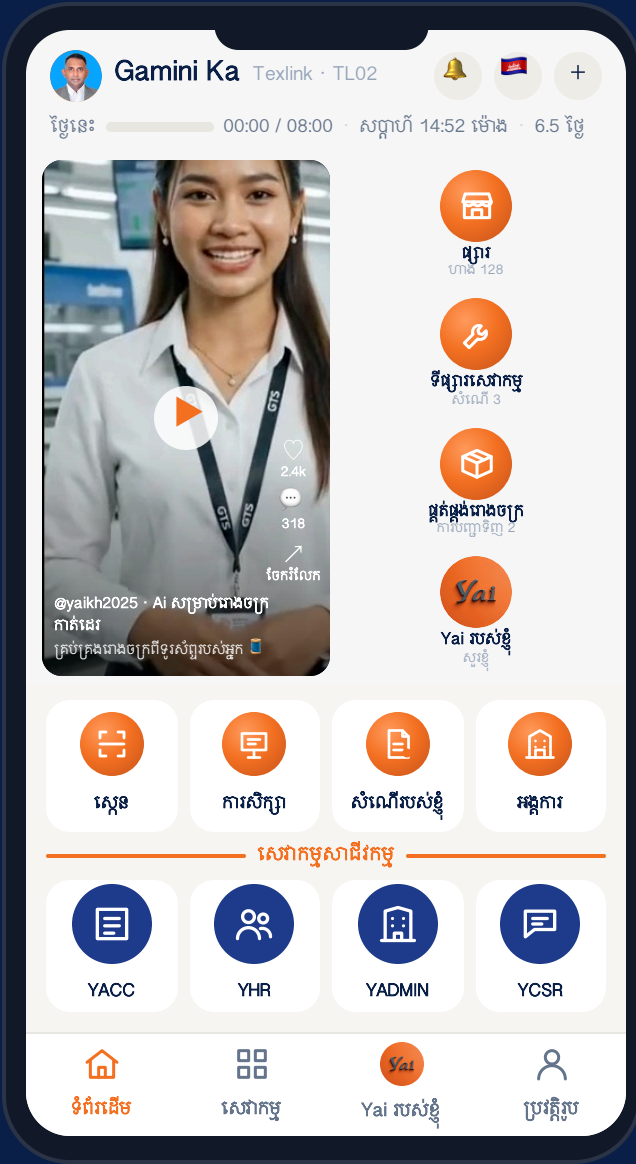

Used while at work for the various administrative functions — YACC, YHR, YADMIN, YCSR. Capabilities change depending on the job designation.

PRODUCTION

Work-related production functions — QMS, Call out, FC, CE, YTM, 4DP, YPI, MRP, YM Shop, YTM Shop. Same as Admin: what each user sees differs by job role.

វីដេអូ · Video Feed

Who it serves

WORKER
AI-powered safety, motion and workplace support, right from the phone. Informal economic support — Phsar marketplace.

SUPERVISOR
AI planning and live data for faster, easier floor management.

MANAGER
One view of production and sales, without chasing spreadsheets and emails.

OWNER
Secure AI-powered business intelligence across the entire operation.

BUYER
Live factory data for quality, capacity and sustainability.

GOVERNMENT
AIoT data for compliance, labour, tax, customs and industry oversight.

AI-Native Manufacturing Intelligence for soft goods.

Price

Starter Small business 10–15 users	\$120 per year
Growth Medium business 100–300 users	\$750 per year
Enterprise Large business 300–1,000 users	\$1,200 per year

All prices in USD, billed yearly.

Main AI functions

- ◆ Ai Web, Mobile systems
- ◆ AI Agent
- ◆ AI OT
- ◆ Drones / Robots

The problem

BRANDS

AI-native manufacturing is here, but factories still run on Excel, email and chat — too slow.

GOVERNMENT

The digital economy requires accurate data, faster reporting and transparency.

SOCIETY

Cambodian society is converting to a digital lifestyle, but many factories still rely on paper and disconnected tools.

ASEAN

Vietnam, Thailand, Malaysia, Singapore and even China are converting to AI-native manufacturing — Cambodia has not gained that edge yet.

AI-Native Manufacturing Intelligence for soft goods.

40 years of factory administration and production, built into one platform.

70+ multi-platform apps

14 special AI agents · 20 certified AI integrations · one login for the whole factory.
